

## Third Grade Summer Work

Third Grade Families,

Welcome to Third grade! I am so excited to have you in my class this school year! Here are some skills and activities I would like you to practice over the summer.

Over the summer, I would like you to read. You can choose to read any book, with anyone, anywhere. I would like you to challenge yourself to read for at least 20 minutes at a time. I would like you to keep a record of the title of the book you have read, and record how long you have read. This can be on any piece of paper, or notebook you choose. Feel free to decorate the reading log if you like. When we return to school, I will be checking your reading log and anyone who reads for more than 10 hours will receive a homework pass to use in the 1st quarter of school. Please choose one book to be your favorite and be prepared to share with the class why you loved that book the most.

To keep our math facts strong, please take the time over the summer to practice your addition and subtraction facts. You can make flash cards, you can use any apps on iPads or computers, or you can even challenge your family members to see who can add and subtract the quickest. Please continue to practice your facts over the summer as you have worked so hard to learn them over the past year.

The last piece of summer work is to go out, have fun with your families and relax! I would love to hear all about your adventures over the summer once we return to school! If you would like to keep a writing journal about your summer to keep track of all the fun things you have done, it is optional but highly encouraged.

Enjoy your summer!

Sincerely,  
Ms. Jabbour
